

MARK HARVEY C. LEDUNA

markharvey.leduna@gmail.com | +63-995-982-2419 | San Carlos City, Negros Occidental

SUMMARY

Visionary Technology Leader and Solution Architect with a proven track record of aligning **Enterprise Security (SOC2/PCI)** with scalable **Full-Stack AI-Integrated Development**. Expert in modernizing **Identity Management (AD/M365)** to drive organizational agility and secure, high-growth technical roadmaps.

CORE COMPETENCIES

- **Full-Stack & AI Architecture:** Designing scalable ecosystems using **Laravel, React (RTK Query/Inertia.js)**, and Tailwind CSS. Proficient in cross-platform development including **C# (Unity/WPF)**, **Python (OpenAI API integration)**, and mobile systems with Firebase.
- **Enterprise Identity & Systems:** Expert administration of **Windows Server 2022 and Active Directory**, including cross-site **GPO implementation** for high-security BPO environments. Specialist in hybrid **M365/Google Workspace** orchestration and secure domain whitelisting.
- **Infrastructure & Network Engineering:** Engineering resilient foundations with **Sophos firewalls, SD-WAN (Peplink) failover**, and **VLAN segmentation**. Deep understanding of the OSI model to ensure low-latency, high-availability connectivity for mission-critical apps.
- **Governance, Risk, and Compliance (GRC):** Proven success in implementing **SOC2 and PCI DSS** frameworks. Experienced in "Audit-Ready Engineering," providing technical evidence and establishing "Security by Design" policies across the entire **SDLC**.
- **Strategic Solution Architecture:** Bridging **Business Process Management (BPM)** with technical execution. Expert in translating complex organizational bottlenecks into automated software solutions while managing multi-vendor accounts (Slack, Adobe, ISP) and technical budgets.

WORK EXPERIENCE

IT Consultant | SkyBridge BPO Solutions (Consultancy)

- **Network Infrastructure Setup :** Led the design and implementation of network infrastructure, including firewalls, servers, and failover systems. Developed network diagrams and implemented redundancy solutions to ensure high availability and reliability.
- **IT Consultancy :** Provided strategic IT consultancy to align technology solutions with business goals, budget, and existing infrastructure. Assessed current systems and recommended cost-effective improvements to optimize performance and scalability.

IT Manager | EmpireOne BPO Solutions Inc.

June 2025 – March 2026

- Scaled IT and Development teams from 3 to 15 members, leading recruitment, onboarding, and performance management.
- Defined IT strategy and aligned infrastructure, security, and development initiatives with business goals.
- Managed departmental budgets (infrastructure, licensing, manpower), optimizing cost and resource allocation.
- Led documentation and implementation of security controls in preparation for SOC2, PCI, and ISO audits.
- Directed development of internal automation systems to improve operational efficiency and reduce manual workload.
- Oversaw full-stack development (Laravel, React, Redux), ensuring secure deployment, scalability, and system reliability.
- Established SLAs, KPIs, and service delivery standards across IT operations and support teams

Adjunct IT Instructor | Central Philippine State University

January 2026 - May 2026

- **Subject Expertise:** Instruct undergraduate students in **Computer Networking** and **Business Process Management**.
- **Mentorship:** Translate complex theoretical concepts into practical applications, reinforcing the ability to train junior corporate staff and communicate technical strategies to stakeholders.

Freelance Full-Stack Developer

March 2020 – April 2026

- **Government Projects:** Engineered a census system with geo-tagging and resident validation for government assistance tracking.
- **Workflow Systems:** Developed a custom Inventory and Job Order tracking system to automate complex operational workflows.
- **Mobile Development:** Built a cross-platform E-Learning mobile application with user authentication and quiz modules.
- **Project Lifecycle:** Managed database design, API integration, and full-stack deployment using Laravel and React

IT Lead / Network Security | EmpireOne BPO Solutions Inc.

June 2024 – May 2025

- **Network Operations:** Managed daily network operations supporting 200+ endpoints across multi-site locations with 99% uptime.
- **Continuity Management:** Directed ISP coordination and managed multi-ISP failover solutions (Peplink) to guarantee business continuity and VoIP stability.
- **Security & BDR:** Headed backup and disaster recovery (BDR) planning and ensured 24/7 network security against internal and external threats.
- **Team Supervision:** Supervised and mentored the technical support team, monitoring ticket resolution and conducting performance reviews.

Technical Assistance Crew | PARASAT CABLE TV

August 2023 – June 2024

- **System Implementation:** Designed and implemented a ticketing system using Google Forms/Sheets to categorize and prioritize subscriber complaints.
- **Data Analysis:** Developed a dashboard to provide management with actionable data on recurring issues for preventative maintenance.
- **Support:** Troubleshoot internet connectivity and configured customer-premises equipment like ONTs and Mesh Wi-Fi.

IT Officer | Raz Pharmaceuticals Products & Trading

January 2021 – March 2022

- **System Architecture:** Architected a custom web-based system to streamline core business operations.
- **Infrastructure:** Established and configured the company's complete IT infrastructure, including network hardware and workstations.

IT Staff | KJ Fairmart Inc.

May 2018 – February 2019

- **Operations:** Setup and maintained POS machines, CCTV systems, and provided technical support for software and hardware issues.

EDUCATION

Bachelor of Science in Information Technology

2015 - 2019

Central Philippines State University
Mabuni, Brgy Guadalupi, San Carlos City,
Negros Occidental, 6127
